<b>Day-to-day soil:</b>	Remove ordinary dirt with a mild soap and warm solution. Dry with a soft, lint free cloth. For more difficult stains, use a stronger detergent; follow manufacturer's instructions closely.
<b>Special Cleaning Problems:</b>	Step 1: Use a nonabrasive household cleaner such as an all-purpose spray cleanser with water and a soft cloth.  Step 2: Use a mild solvent-type cleanser such as rubbing alcohol liberally applied with a soft cloth. Dry area with another cloth, rinse with clean water and dry.  Step 3*: Use strong, active solvent cleansers such as nail polish remover (acetone/water) applied with a soft cloth. Stain should be removed with less than six rubs; if stains persists after 6 rubs, stain has probably set** and may not be capable of being removed. Dry area with another cloth, rinse with clean water and dry.

\*Caution: These solvents are highly flammable. Exercise proper care when cleaning and notify personnel in area of danger. Wear rubber gloves during all cleaning activity. Use caution in cleaning around buttons, stitching and wooden or decorative trim, as these solvents could damage such areas.

\*\*Caution: Although vinyls are protected with PreFixx are resistant to most common stains, some fabric dyes have the ability to create a permanent stain. To minimise any problems for these and order stains, it is recommended that as soon as they are noticed, stains should be cleaned, making sure the recommended cleaning steps are followed in order.
